

Our Commitment to Sustainability

Egal Pads is a leader in the innovation of pads for public use. Our commitment to continuous improvement ensures that our products not only meet high standards, but also minimize environmental impact, reflecting our dedication to a sustainable future.

Rolls vs. Vending

Our rolls are tightly wound without extra packaging. It would take five truckloads of a boxed vended pad to deliver the same amount of Egal pads in one truck, and there would be **16 tons of extra material and packaging** in those trucks - about 400 trees worth!

Rolls vs. Folded

Even a standard folded pad takes twice the volume of an Egal pad on a roll. We only need half the trucks to deliver our product, and that helps the environment!

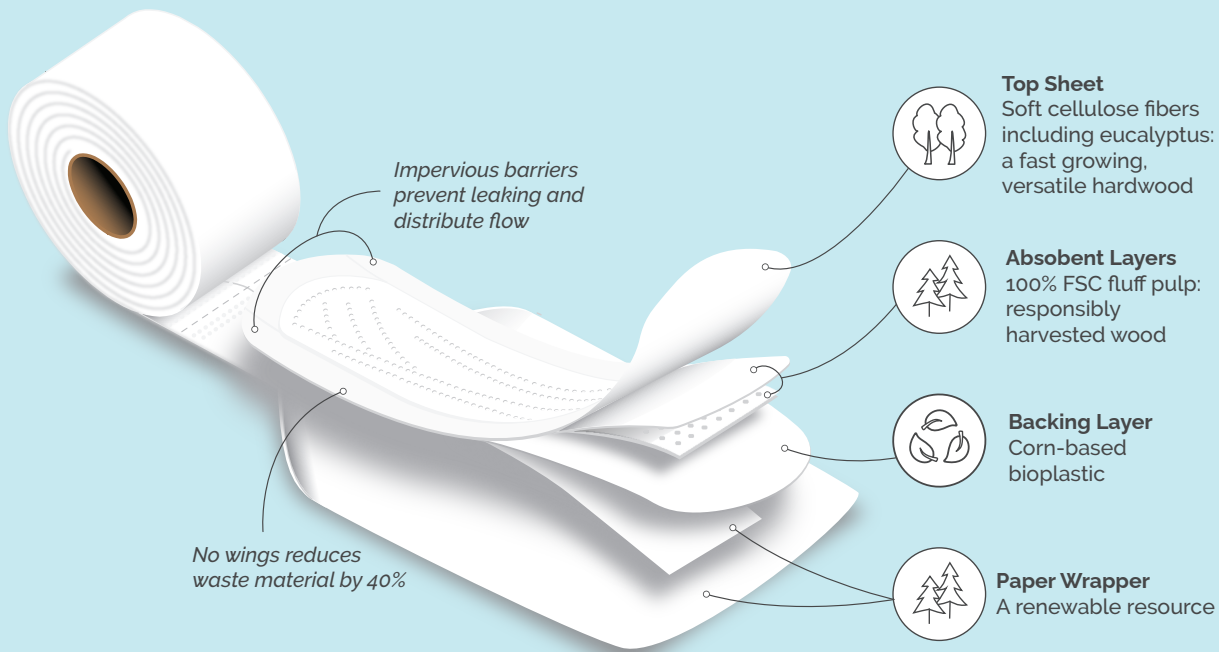

Sustainable Packaging

Our standard rolls are wrapped in paper and shipped in boxes made from recycled cardboard. The inner protective bag is a starch based plastic, as well as the plastic we use to wrap our pallets for overseas shipping

Plant-Based Pads

As a single use, disposable product, it is time to stop using plastics in period pads. With a soft cellulose topsheet, and plant-based bioplastic back, our plant based pads are gentle on your body and kind to the planet

We do not use organic cotton: a low-yield, high energy, water-hungry crop

No superabsorbent polymers: a petroleum product that does not biodegrade

No chlorine bleach
No perfumes
No dyes

Innovative Dispenser Design

Dispenser shipping is wasteful because most of the inside is empty space. Egal custom designed its own durable dispensers so that the front and back halves nest together in shipping, saving 60% of space.
